

## Carterton Community College

Welcome to Carterton Community College

### **Our Mission Statement**

**“High standards and high aspirations-inspiring excellence in a safe and happy environment.”**

We do not take our mission lightly and are working hard to instil this message to all the community, staff, students and parents alike.

The College has come a long way since its days viewed as “the comp” and although this view does still exist (in a minority) we are on the journey to transform this school into a centre of excellence.

We prefer to consider ourselves as progressive educationalists working alongside students to achieve the best possible outcomes.

As the largest member of the Carterton Community Schools Federation, we work with our primary and nursery colleagues to ensure the smooth transition between phases. A high proportion of students come from military background and as such there is a high rate of mobility with students joining and leaving us regularly. Our outstanding pastoral systems and procedures enable all students from different backgrounds to seamlessly integrate into our community. Whether you are a child who has just arrived in the country from Cyprus or a student returning after a 3-year family deployment, or simply transitioning from another local school because of our growing reputation, we will look after you and we will ensure you achieve.

### **Our Vision**

We want students here to make better progress than any other education provider.

Over the next 5 years at CCC we will secure above national average outcomes for all groups of students through a personalised, professional and reflective approach to both learning and development.

Through consistent and effective teaching, learning and intervention, all our students, regardless of starting point, will make outstanding progress and achieve excellent results which compare favourably to the national picture successfully preparing them for the next stage in life.

Through honest endeavour, we aim for each and every one of our students to demonstrate independent success through a supportive and encouraging environment regardless of race, gender

or background. Our students will have excellent opportunities because we will provide effective guidance and a broad and balanced curriculum. Our students will achieve high standards because we will provide outstanding teaching so that our students will love learning. Our students will be well rounded, safe, focused and confident young adults because we will inspire and challenge them.

Excellent behaviour and positive relationships already exist between all members of the school community to ensure all our valued and reach their full potential; consequently, we want all our students to get the best possible results and exceed personal and national targets.

We will be a centre of excellence, providing outstanding education and facilities for all.

Do not hesitate to make an appointment to come and look around.

Damian Booth  
Executive Headteacher
